06/2016 - Today

Photon Group - Head of Software Development

Photon Group is a multinational of products for bodybuilding, weight loss and wellness. I work in ecommerce platforms, logistics and business dashboards.

Technical leader responsible for setting up the team, managing software development with agile methodology, definition of technology stack, architecture, and delivery strategies aiming cost reduction, performance, scalability and availability .

Tecnologias usadas: Java 8, Spring MVC 4, QueryDsl, Selenium, Maven, SpringData, RabbitMQ, Rundeck, Hibernate, Jetty, Postgresql, Mongo, Git, ElastiCache, Rds, Ec2, Ses.

03/2015 - 06/2016

Photon Group - Senior Developer (1 year 4 months)

Photon Group is a multinational of products for bodybuilding, weight loss and wellness. I worked in ecommerce platforms, logistics and business dashboards.

- Automated testing infrastructure deployment with Jenkins and BrowserStack.
- Integrations (shipping carriers, payment providers, anti fraud, marketing tools).
- DevOps using Nginx, Chef, Rundeck and monitoring with New Relic APM and Browser.

Technologies used: Java 8, Spring MVC 4, QueryDsl, Selenium, Maven, SpringData, RabbitMQ, Rundeck, Hibernate, Jetty, Postgresql, Mongo, Git, ElastiCache, Rds, Ec2, Ses.

04/2014 - 03/2015

Rocket Internet - Senior Developer (1 year)

Rocket Internet is a venture capital, I worked on Airu that is a marketplace of fashion and design in Brazil.

- Development of reactive apis with Play Framework and Java 8
- Development components with bootstrap 3, Jquery, Less, Sass and angular JS
- Integration with SIGEP (Brazil postoffice system)
- Migration on-premise servers to aws cloud (AWS CloudSearch, EC2, S3, ElastiCache)
- Implementation of Continuous Delivery and automations with Jenkins
- DevOps with apache, puppet, new relic APM and browser

Technologies used: Java 8, Spring, Maven, Couchbase, Hibernate, Tomcat, Postgresql, Git, ElastiCache, Rds, Ec2, CloudSearch, Solr.

05/2013 - 04/2014

UOL - Senior Developer (1 year)

UOL is the largest portal in Brazil having many products online, I worked in the payment gateway.

- Development Api Restfull (HATEOAS) and SOAP Web Services
- Integration with external and internal systems using Apache Camel.
- Implementation of continuous delivery and integration with hudson
- Implementation ofDDD,TDD and tech talks on the team.

Technologies used: Java 7, RabbitMQ, Spring MVC, Jersey, Hibernate, Jetty, Oracle, MongoDB, Git, Apache Camel, Selenium, Maven.

02/2012 - 05/2013

UOL - Developer (1 year 4 months)

UOL is the largest portal in Brazil having many products online, I worked in the marketplace "Todaoferta" and collective shopping "TodoDesconto".

- Maintenance, development of e-commerce platforms.
- Clustering, caching and integration systems.
- Implementation continuous delivery and automations with Jenkins.
- Development of indexer and search cores of solr.

Technologies used: JBoss, JMS, EJB, Solr, Mysql, Spring, Hibernate, Selenium, MenCached.

03/2011 - 02/2012

Dynasty Technology Group - Developer (1 year)

Dynasty is an innovative and solid company in the branch of banking and industry, I worked on a product for real time ATM monitoring.

- Development of an ATM monitoring dashboard for bank Bradesco
- Scaling the system to monitor 5000 to 35000 ATM.
- Communication Development based on JMS and sockets.

Technologies used: WebSphere, WebLogic, JSF, JMS, EJB, Oracle, Hibernate, Svn, Maven.

08/2009 - 03/2011

Capgemini - Developer (1 year 8 months)

Capgemini is the largest national IT services company. I worked on the term deposit product for the employees of Banco Bradesco.

- Development internal systems of Bradesco bank using JSF
- Integration of mainframe systems (COBOL) using JCA

Technologies used: Java 5, JSF, EJB, Tomcat, Spring, Tiles, Maven, Svn.

01/2008 - 08/2009

Proxima Sistemas - Junior Developer (1 year 8 months)

Proxima is a commercial automation company, I have worked on raising requirements with the client and developing improvements in Java.

- Raise with the client new features to the software
- System Evolution
- Deploy systems on the client.

Technologies used: Java 5, JSF, Tomcat, Svn.

Education

Bachelor in Information Systems - University of the South Coast Paulista - 2008 - 2011 (4- years)
Computer Technician - State Technical School of São Paulo - 2005 - 2006 (1.5 - years)

Languages

Portuguese - Native
English - Advanced

Courses

Enterprise Application Architect Java EE
Managing agile projects with Scrum
Functional Programming Principles
Principles of Reactive Programming

Latest books read
